about G5_G1, G2_G6, G4_G8, G7_G3:

J1 you connect to a DOUTx4 output, which deliver 8 DOUTs on 1 shroudet header

But we only use 4 DOUTs on the Controlboards... with this jumpers you decide which one!

IF you use a CLOCK coming from J21, then dont set G1_G5!

Front-Panel for AIN_4 v1.2

i measured the PCB, and made a drawing in order to create a hand-drilled Frontpanel... so dont take the values as 100% true...:
