# Hardware Requirements

- Soldering Iron - with a Dip that can Handle Thruhole-Parts and 1206 SMDs, solder Paste...
- The other Parts from the BOM
- a Midibox Core32

# Building and BOM

All necessery Information is printet on the PCB, but also check the Shematic...

then decide **how often you want to order all off, the BOM Quantity is for 1Module**
On one PCB you have 2 ident MidiIO-Modules, on JLCPCB you order typicaly 5 PCB, so your quantity may be 10x
BUT dont buy multiple Flatbandcables... these are hundrets of meter!

**1 times: 45€** 25€ parts and 20€ shipping...shipping excl fat
if you go over 50€ shipping is free.
lets take a look if we order it
**5 times: 95€** incl free shipping excl fat
**10times:176€** incl free shipping excl fat

4x (or 20x) Leiterplatten Montageblock aka Standoffs 100x summed 30€
You will also need M3 Screws - 2 off them...
Also here it is clever to order 100 pieces for a cheaper price - you will need this on all my projects...

# Frontpanel

**I made a DXF File which you can print, and drill it DIY or**
**you can send to:** (once the prototypestate is gone)
frontpanels.de in germany ca 18€ a panel
The Beast - UK
Schaeffer-ag.de
**Recommend Material**
2mm x 128.5 x 15 Aluminium, anodised
frontpanel-euromidi.zip - NOT TESTET

**A cheaper way is: order a 1,6mm thick Aluminium PCB as Frontpanel:**
I will test this... this are the gerbers:
