MB-606RE

Introduction

The MB-606RE is a re-edit of CYM/HH and BD/SD drum parts of the Roland TR-606 to be controlled via MIDI (midibox) or CV through analog-Sequencers , in a a Eurorack-designed panel.
Well known Circuit Mods from around Web & time are included by default.

FrontPanel

On Re-design

First Version:

- Drilling + Engraving + SmashTV Core32 Layout

General Design

The MB-606re is part of the EuroLand Group... (606, 808, 909)
It can be used in 2 Cases:
Midi /CV+Trig
1. Midi: Use the MB-Modulbox Standartmodules, for Digital UI and CV+Trig-Generation

2. CV+Trig: Just Plug CV or Trig Jacks into the Analog Modules...without Midibox.

Use with Midi

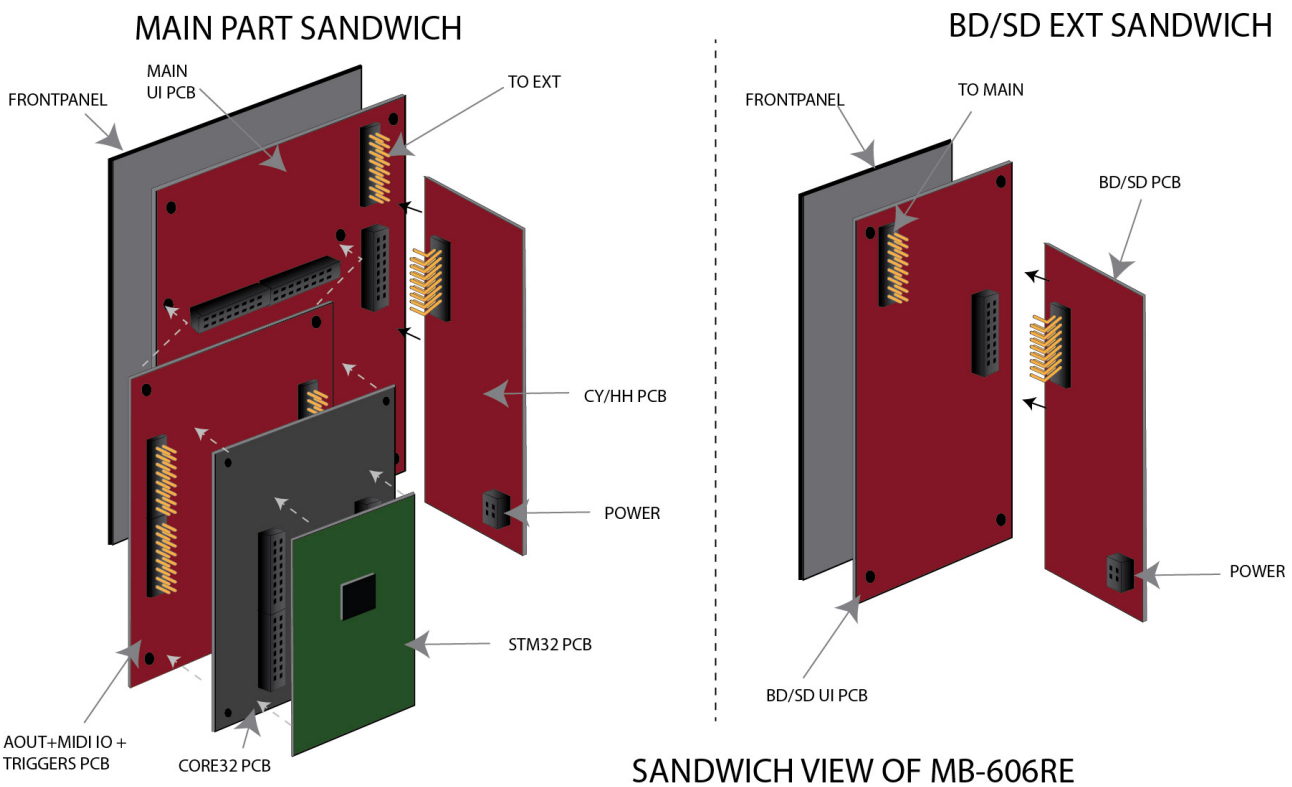

MB-Modulbox Main PCB UI

- **Access** to System-Settings, Channel, NoteNumbers
- **CV+Trig Out-Jacks** for Euroland Drum Modules

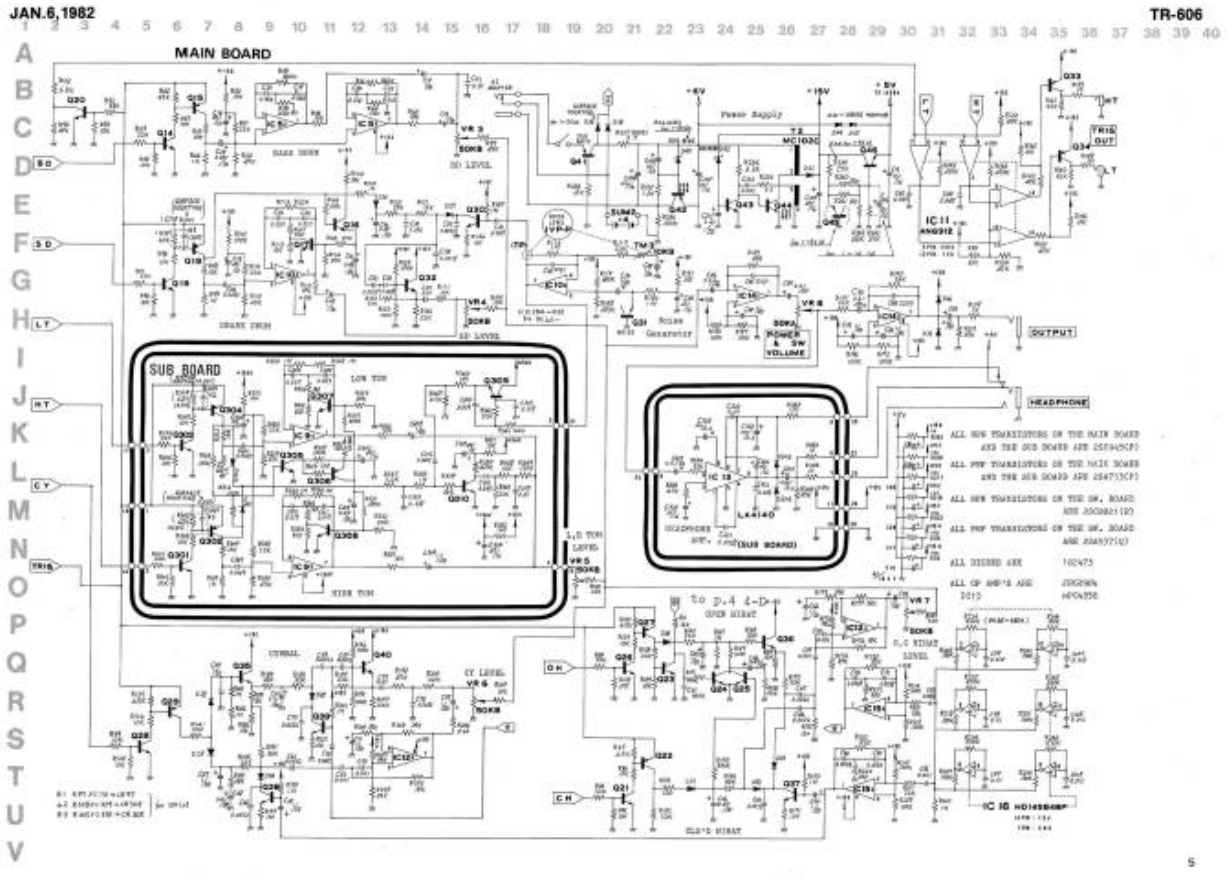

MB-Modulbox 8xPotentiometer Module

When using the Euroland Modules via Midi, then there are some Performance Parameters aviable: accessable via MB-Modulbox 8xPot - PCB. Have to be activated via Software. (Menue Point) All Functions have effect on all 8 Voices @ once.

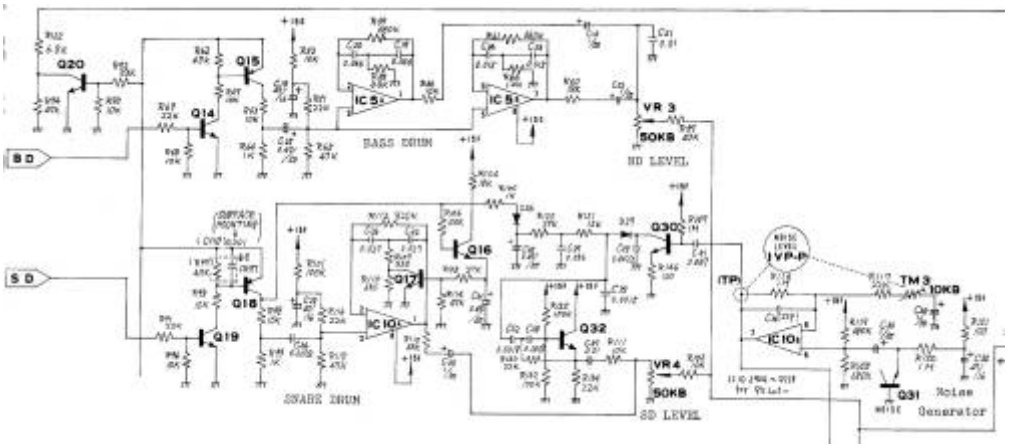

- **1.Velocity Offset** (-+64 > with Center Postiton = normal)
- **2.Velocity Kill depending Note Kill** (-+64 > with Center Position = normal > Full Spectrum)
- **3.Random Kill** (0=full Kill, 127 no Kill, Normal Position > 127)
- **4.Velocity 2 TriggerLength** (-+64 > with Center Position = normal 10ms, turn right:time inc by velocity in%, turn left:decrease%)
- **5.Accent:** (0-127-normal 127)
- **6.——: could be something like Roll** * 7.——: not used, could be something like a Accent for a Group of CVs
- **8.——: not used, could be something like a Accent for a Group of CVs === MB-Modulbox 8×8 LED-Button-Matrix === Set CV + Trig Routing (some kind of trigger matrix), standard is 1:1 routing, so no need for this if fixed setup. ==== Use with Midi or with Analog CV+Trig ==== Here are only the Analog-Drum-PCB discussed, since all other Digital UI is based on MB-Modulbox Standart Modules, the MB-Modulbox Main PCB2 is special Variant, described here. === 606 BD+SD, 606 HH+CY === To spare Space:** we sandwich in 2 layers
  * 1st PCB **: BD+SD UI-PCB / HH+CY UI-PCB »> Breakoutboard+Potentiometer Boards** * 2nd PCB **: Analog Circuits: 2n We get the Analog Circuits mounted 90° angled with vertical female socket and angled DIL Pinheaders for better heat dissipation ==== Sandwich view - Analog Boards ====**
