

# MB-606RE

## Introduction

The MB-606RE is a re-edit of CYM/HH and BD/SD drum parts of the Roland TR-606 to be controlled via MIDI (midibox) or CV through analog-Sequencers , in a a Eurorack-designed panel.  
Well known Circuit Mods from around Web & time are included by default.

## FrontPanel

On Re-design

First Version:

- [Drilling + Engraving + SmashTV Core32 Layout](#)

## General Design

The MB-606re is part of the EuroLand Group... (606, 808, 909)

It can be used in 2 Cases:

Midi /CV+Trig

**1. Midi:** Use the MB-Modulbox Standartmodules, for Digital UI and CV+Trig-Generation

**2. CV+Trig:** Just Plug CV or Trig Jacks into the Analog Modules...without Midibox.

## Use with Midi

### MB-Modulbox Main PCB UI

**Access** to System-Settings, Channel, NoteNumbers  
**CV+Trig Out-Jacks** for Euroland Drum Modules

### MB-Modulbox 8xPotentiometer Module

When using the Euroland Modules via Midi, then there are some Performance Parameters available: accessible via MB-Modulbox 8xPot - PCB. Have to be activated via Software. (Menu Point) All Functions have effect on all 8 Voices @ once. **1.Velocity Offset** (-+64 > with Center Position = normal) **2.Velocity Kill depending Note Kill** (-+64 > with Center Position = normal > Full Spectrum) **3.Random Kill** (0=full Kill, 127 no Kill, Normal Position > 127) **4.Velocity 2 TriggerLength** (-+64 > with Center Position = normal 10ms, turn right:time inc by velocity in%, turn left:decrease%) **5.Accent:** (0-127-normal 127) **6.—: could be something like Roll** **7.—: not used, could be something like a Accent for a Group of CVs** **8.—: not used, could be something like a Accent for a Group of CVs** === **MB-Modulbox 8x8 LED-Button-Matrix** === **Set CV + Trig Routing (some kind of trigger matrix), standard is 1:1 routing, so no need for this if fixed setup. ===== Use with Midi or with Analog CV+Trig ===== Here are only the Analog-Drum-PCB discussed, since all other Digital UI is based on MB-Modulbox Standard Modules, the MB-Modulbox Main PCB2 is special Variant, described here. === 606 BD+SD, 606 HH+CY === To spare Space: we sandwich in 2 layers**  
 \* 1st PCB : **BD+SD UI-PCB / HH+CY UI-PCB** »> **Breakoutboard+Potentiometer Boards** \* 2nd PCB : **Analog Circuits: 2n We get the Analog Circuits mounted 90° angled with vertical female socket and angled DIL Pinheaders for better heat dissipation ===== Sandwich view**
