

# Open Source Hardware

Other cool open source projects from around the net.

- [theutis.com](http://theutis.com) - Open-Source MP3 player to listen to your MidiBox music on.
- [Yampp](#) - yet another Open-Source MP3 player.(this one has USB capabilities)
- [Arduino](#) - An open-source physical computing platform very cool programmable I/O board.
- [Wiring](#) - Wiring is an open source programming environment and electronics i/o board for exploring the electronic arts, tangible media, teaching and learning computer programming and prototyping with electronics.
- [Ronja](#) - Ronja is a free technology project for reliable optical data links with a current range of 1.4km and a communication speed of 10Mbps full duplex.
- [Fab@home.org](#) - prototyping tool!!! (this is just cool)

## Circuits

Circuit designs that can be incorporated into projects.

- [RIAA Compensated Stereo Preamp](#) - A turntable preamp board and circuit design. usefull if you want to make a Traktor mixer/Controler with an optional turntable input.
