

## Dual SSM 2044 PCB Bulk Order

This page is about Seppoman's bulk order for the [ssm2044\\_pcb](#).

More information and sound demos can be found [here](#) and [here](#).

**Warning:** This is not a suitable project for absolute beginners. The soldering isn't very difficult, but you will need either an AOUT\_NG (SMT soldering required), an AOUT module (which needs to be expanded with the bipolar option) or two (!) AOUT\_LC modules, or another type of CV source to control this module, in addition to the actual synth (SID/FM) you want to use it with. So a bit of soldering experience and knowledge about the MidiBox platform is definitely recommended.

**The original bulk order is closed.** I might start another bulk order this year if there's enough demand. You can express your interest in getting PCBs by adding yourself to the list below. **Note that I don't promise to start this bulk order at any specific time of year, so please don't send me PMs about that - I'll collect orders from everyone on the list and will announce the bulk order on the forum as soon as something is happening!**

| Username       | Number of PCBs |
|----------------|----------------|
| rosch          | 10             |
| modularman     | 4              |
| henrikgo       | 1              |
| kroutshev      | 2              |
| Strophlex      | 5              |
| booster        | 2              |
| jooks          | 2              |
| kok6           | 2              |
| ioroby         | 2              |
| lead bromide   | 2              |
| SexyBeast      | 4              |
| stevencléments | 2              |
| Morten         | 2              |
| jovius         | 2              |
| unrise_lyrical | 4              |
| Tamiflu        | 4              |
