

TM5 Gate/Trigger Input

this is one essential part for my [triggermatrix5](#)

- * Levelshift from 5V to the for the MCU required 3V, with a Resistor Divider
- * Overvoltage Protectect with TVS-Diodes
- * Preamp-Section

5V, 3V or Pre-Amped input - can be set vie Jumpers and Potentiometers, the PCB itself should be mounted on the Groundplate off the housing, the housing should have a service-plate to access this Settings!:

8 Channels, are managed here, so in order to have 16channels, you need 2 off this PCBs if you dont want a Preamp, then dont stuff the Preamp-section > this will make this PCB a lot off cheaper!

Schematic

[tm5-gatein-schema.pdf](#)

Building and BOM

dont order this Parts, they are mostly pre-soldered on the PCB!
