

MIDIbox User Projects

This space is for user projects and project documentations.

Projects don't have to be finished, works in progress should also be linked here!

For a complete overview of official projects see the MBHP [Projects](#) page!

<box 47% left blue|**Controllers**>

Completed

- **Protodeck** - Ableton Live Controller
- **Pedal Box / Board**- Expression Pedal Controller / Floorboard
- **Stukontrol**- MIDI Controller
- **Modulbox**- Modular Control Surface

- **Scratch controller**
- **Questionable**- DJ Controller
- **Selektor**- DJ Controller
- **TOS** - DJ Controller
- **YATK Forum Thread**

- **ACSensorizer** - Sensorizing controller
- **Arkade** Joysticks, Distance sensors, Ribbons Controller
- **MIDIboxKB**- C64 keyboard as input
- **VOIRINOV**- Akai MPD24-like MIDIbox

- **MIDIbox UC** - Universal Control: Extended SysEx Handler
- **MB-LRE8x2**- 16 Led rings encoders
- **msq-cc-lre**- 8Ch x 32CC Bank-Synthesitor with Motion Automatition and Velocity Offset from Triggers - based on 2x LRE8x2 - Nord Drum Edition
- **msq-cc-bcr**- 8Ch x 32CC Bank-Synthesitor with Motion Automatition and Velocity Offset from Triggers - with BCR2000 instead of LRE - Nord Drum Edition

In Progress

- **MB-Modulbox-NG** Modular Controllers
- **MB_OLRE16**- 1 row of 16 encoders with oleds and 32 segments RGB led rings.

- **The Thing DJ-Mixer**
- **Fadercore** - Fadermodule for Audio DAW

- **MIDIboxFX** - midifying analog gear
- **Korg Wavedrum** MIDIfication
- **Velocity converter**

</box>

<box 47% right red|**Synthesizers**>**Completed**

- **MB-6582**- MIDiBox SID Synthesizer V2 using 8xSID PCB and “step C” control surface PCB.
- **MB-TWINSid**- MIDiBox SID Synthesizer V2 using 2xSID PCB and dedicated control surface PCB .
- **SID R8TR**- 3U rackmount case SID
- **MIDiBox FM V2.1** - A complete multitimbral synth using two OPL3s and the STM32F4 core
- **OPL3 module, modified** - 5V option
- **MIDiBox VGM Player** - Plays VGM files on up to four Sega Genesises' sound chips (YM2612/YM3438, SN76489/SN76494/SN76496)
- **Apparat 20** - Seppoman's MBFM & vocoder phone
- **Antix MBFM** - A MBFM Build by Antix
- **MIDiBox SpeakJet** - SpeakJet speech synthesizer
- **MIDiBox SpeakJet K64 Modul** - C64 Keyboard Controller for SpeakJet
- **MIDiBox TIA** - Atari 2600 Synthesizer
- **MIDiBox AY (YM) V2** - AY-3-891x / YM2149 Synth
- **Coresound** - Pic based digital synthesizer

In Progress

- **MB-ReSynth** - 4U FM/TIA/SID Synths
- **MB-DigiRoland** - Roland Analog Drums driven by digital Pots
- **MIDiBox Quad Genesis** - Up to four Sega Genesises' worth of sound chips, controlled by STM32F4 core. 4x YM2612 OPN2, 4x SN76489/94/96 PSG
- **MIDiBox SNES APU** - Super Nintendo APU synth
- **MIDiBox POKEY** - Atari Pokey synth
- **MIDiBox 3396** - CEM3396 based synth
- **MIDiBox SD Card Sample Player** - SD Card Polyphonic Sample Player

</box>

<box 47% left green|**Miscellaneous**>**Completed**

- **MIDiBox Mixer** based on PGA chips
- **MIDiBox Matrix** - MIDI I/Os Matrix
- **MIDI Mapper** - MIDI Channel Mapper
- **MIDI Master Clock**
- **MB Clock** - How to handle a realtime clock (RTC) with I2C
- **SSM2044 VCF** - Low pass filter board
- **clock2audio2clock** - Record/Playback Midiclock via Audio-Recording

- [dipCoreF4](#) - An STM32F4 Compact Core.

In Progress

- [MB Sync24](#) - Midi clock to Roland sync24 converter
- [MB Visual Metronome](#) - Midi Metronome
- [MidiBoxDMX](#) - DMX light control with MidiBox
- [MBlight Mind-Machine](#) - an audio/visual brain stimulator
- [mb-scope](#) - 6ins+2sync Dual TFT Scope
- [MIDIbox Audio Matrix](#) - digitally controlled analogue audio/CV patch router
- [MIDIbox Live](#) - Complete and automatic integration of MIDIbox and Ableton Live using LiveAPI.
- [SSM2164 VCA](#) - Quad channel VCA board
- [EASY CV](#) - EuroRack-sized - 8x LFO+ENV-combi with 8AOUTChannels for VCA-VCF based Setups
- [MIDIbox 2069](#) - Based on the KORG NJM2069 Music Voicing System

</box>

<box 47% right orange|**Sequencers**>

Completed

- [BLM16x16+X](#) Matrix Controller
- [TPD](#) - Track Position Display
- [BLM 16x4](#) - Button LED Matrix
- [MIDIbox Arp](#) - A MBHP Arpeggiator
- [DSEQ32](#) - 32 step drumseq
- [Chaos Matrix](#) Oberheim Matrix 1000 Programmer
- [The HAARP](#) - Hardware Advanced Arpeggiator.

In Progress

- [Triggermatrix](#) - 16track Trigger-Sequencer & Trigger-router - a liveact based center of a midisetup
- [16th fixed PolySequencer](#) - 16th fixed 2x4track-poly-Sequencer - the poly note/melody-source for [Triggermatrix](#)
- [AlternativeSequencer](#) - Alternative ideas for sequencers
- [MB808](#) - 808 Clone Sequencer
- [MB909](#) - 909 Full Clone
